Alama EQUAL Mucormycosis 2018

Utambuzi

Neutropenia >10d au alloHSCT → Kinga inayotumika ya ukungu

3

72-96h ya homa inayoendelea → Kifua CT

3

Halo iliyo kinyume

– CT/MR staging: kichwa, shingo, tumbo

2

– BAL

– Microscopy ya moja kwa moja, ikiwezekana kutumia viangaza vya macho

1

– Utamaduni

1

– Kuvu PCR (sufuria, Aspergillus, Mucorales)

1

Matokeo ya mtihani wa kibiolojia hasi → Biopsy

– Utamaduni

2

– Histopatholojia

2

– Majaribio ya msingi wa Molekuli kwenye nyenzo safi ya kliniki au tishu zilizopachikwa

1

Kutenga hukua → Utambulisho wa kiwango cha spishi na upimaji wa kuathiriwa

2

Laini ya kwanza ya matiba

Uharibifu wa upasuaji

2

na pembezoni za utaftaji zilizo wazi kwa hadubini

1

L-AmB ≥ 5 mg/kg/d au

3

Isavuconazole pamoja na TDM au posaconazole posaconazole yenye TDM

2

Udhibiti wa mambo ya hatari: Neutropenia, hyperglycaemia, ketoacidosis, corticosteroids

2

Fuatiliaw

CT scan siku ya 7

2

CT scan siku ya 14

2

Uchunguzi wa CT kila wiki hadi uboreshaji

2
